

Paperless Factoring by InLattice

InLattice.Net provides a web based application to factoring companies to exchange data between clients and their customers. Your clients can create invoices over the web or upload invoices directly from their accounting package. You can get the invoices verified and approved by your client's customer over the web. Invoice data can be posted directly to your factoring software. Plus, provide up to date invoice status and payment information on the web to your customers automatically.

Visit us at www.inlattice.net

Benefits

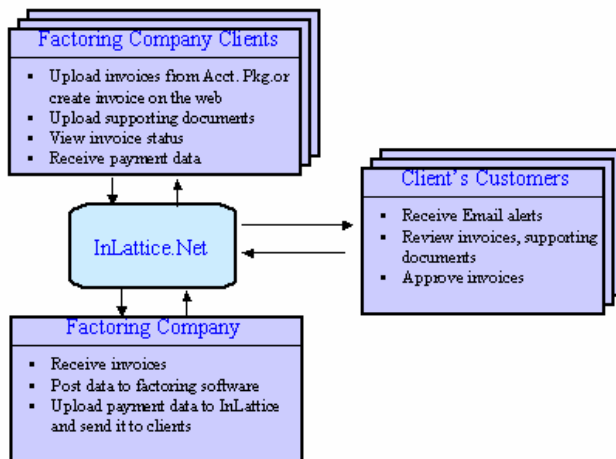

- Eliminate paper handling, errors and processing time with streamlined paperless process.
- Easy tracking of incoming invoices, supporting documents and notes.
- Automated customer approval process.
- Provide invoice status and payment information to clients.
- Get connected with your clients, their customers with a common view of documents.
- Automated routing for review and approval in a secure environment.
- Eliminate data entry effort.
- Reduce errors the result of document handling.
- Reduce phone calls to clients and their customers

Document Status Example

Document status, including customer approval can be tracked online

Action	First Name	Last Name	Company Name	Timestamp
